

# In Vivo Efficacy Fabry Mice: "Combination Therapy"

Pre-treat with single  
infusion of  $\alpha$ -galactosidase A

GB3 ↓

2 WEEKS

NB-DNJ, AMP-DNJ  
or D-tet-P4  
(IP dosé, 1x daily)

4 WEEKS

GB3 ↑

Study Goal: Evaluate the effect of Substrate Inhibition  
in Reducing GB3 Re-accumulation.

FIG. 1A

# Fabry Mouse Liver Re-accumulation of GB3 (IP delivery)
